Art Unit: 1651

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a method for screening compounds against an unactivated target.
- II. Claims 13-22, drawn to a method for discovering kinase inhibitors.
- III. Claims 23-38, drawn to a method of designing an inhibitor.
- IV. Claims 39-61, 88-90, drawn to a method of designing an inhibitors of a test kinase.
- V. Claims 62-63, drawn to a method of identifying an inhibitor of a test kinase.
- VI. Claims 64-69, drawn to a method of identifying an allosteric binding site.
- VII. Claims 70-74, 87, drawn to an inhibitor.
- VIII. Claim 75, drawn to a pharmaceutical composition.
- IX. Claim 76, drawn to a kit.
- X. Claims 77-85, drawn to a method of inhibiting kinase activity.
- XI. Claim 86, drawn to a method of making a pharmaceutical.

The inventions are distinct, each from the other because:

Inventions I-VI, X, XI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are all methods for different functions with different method steps to accomplish those functions.

Art Unit: 1651

Inventions VII, VIII and I-VI, X, XI are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the inhibitor or pharmaceutical could be found, screened, discovered, designed, identified or made by methods other than those of Groups I-VI, X, XI.

Inventions IX and I-VI, X, XI are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the methods could be practiced by hand without the kit.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1651

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
